

DEPARTMENT OF NEUROBIOLOGY AND DEVELOPMENTAL SCIENCES

Seminar

Gwen V. Childs, PhD
Professor and Chair

Department of
Neurobiology and
Developmental Sciences

The University of Arkansas
for Medical Sciences

*“Immunocytochemistry: Challenging paradigms to illuminate
new discoveries in the pituitary”*

Tuesday, April 23, 2019

12:00 Noon

Rayford Auditorium

Biomedical Research Building 2

Room 106-2

This seminar is the talk that Dr. Childs gave at Experimental Biology where she received The Gomori Award from the Histochemical Society. It ranges from a review of the history of Immunocytochemistry to a review of discoveries that are now, revisited by single cell RNA-seq.
